July 31st 2018

Dear Customers,

Agomoon Spri is a manufacturer of Grow tents and Indoor Culture equipment and operates under the Secret Jardin trademark. Headquartered in Europe (Belgium), the company has a R&D office in France and a Manufacturing office in Hong-Kong.

Secret Jardin products are distributed by 35 wholesalers worldwide and 2,000 specialized resellers. Secret Jardin is known as the genuine manufacturer of the Dark Room series, the first Mylar tent brought to the market in 2006.

Secret Jardin Grow tents are made of high quality fabric enclosure, commonly named Mylar. These tents are intended to be used for agricultural production as well as indoor growing. To ensure the conformity of our products for Indoor growing purposes, all Secret Jardin tent canvasses are tested by an external laboratory (SGS Group) on the presence of hazardous substances above levels that are harmful for plants.

Despite there are no industry standards for this matter, we have chosen to use the EN 14372:2004 standard which is related to the Safety requirements for child use and care articles and which contains a test method to measure potential damaging chemical substances.

This method complies with the REACH regulation, adopted by the European Union, which aims to improve the protection of human health and the environment from the risks that can be posed by chemicals,

All our test reports are available on our website at: <http://www.secretjardin.com/certified-documents.php>.

Through our ongoing Quality Policy, we are pleased to ensure the best level of safety for your indoor culture products.

Thank you for your interest in Secret Jardin Grow Tents,

Sincerely,

Jacques BORDES
CEO
Agomoon Spri
